Coronavirus Cases:

333,255

Deaths:

9,524

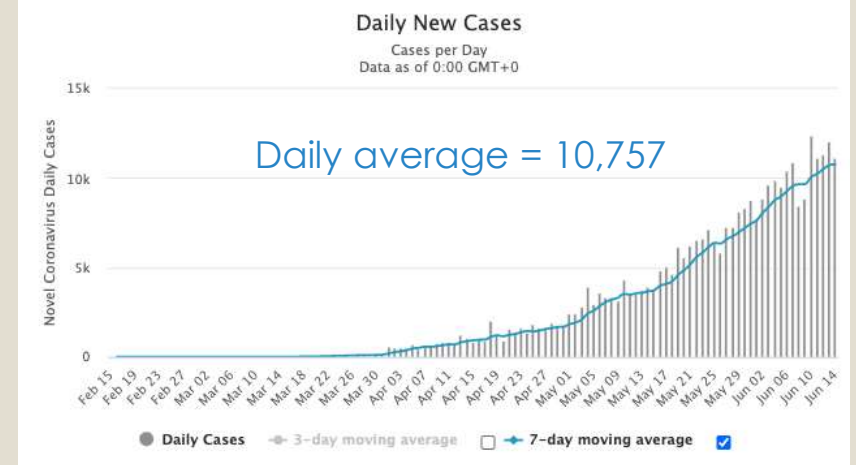

Recovered:

169,817

### Total Coronavirus Cases in India

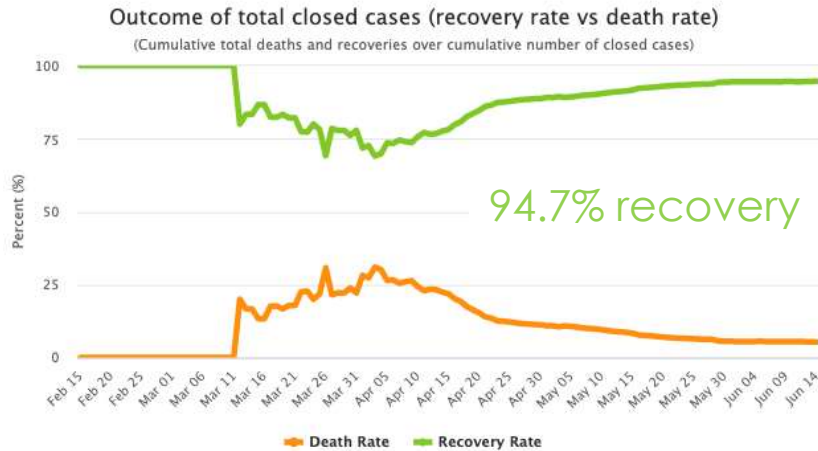

### Daily New Cases in India

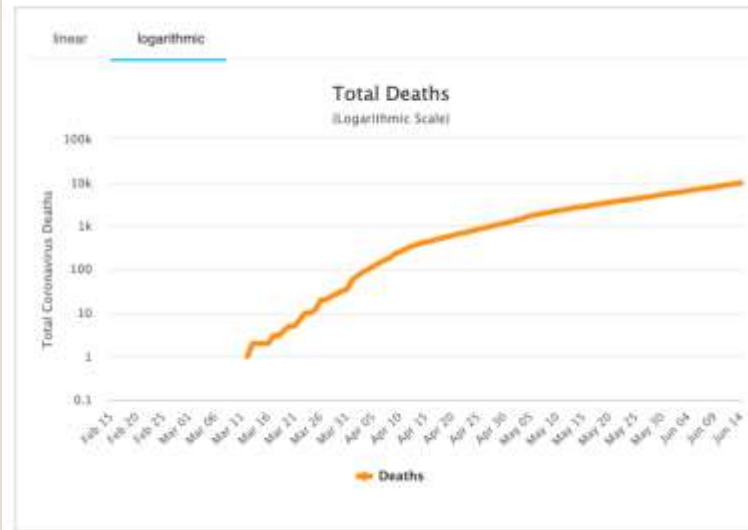

<https://www.worldometers.info/coronavirus/country/india/>

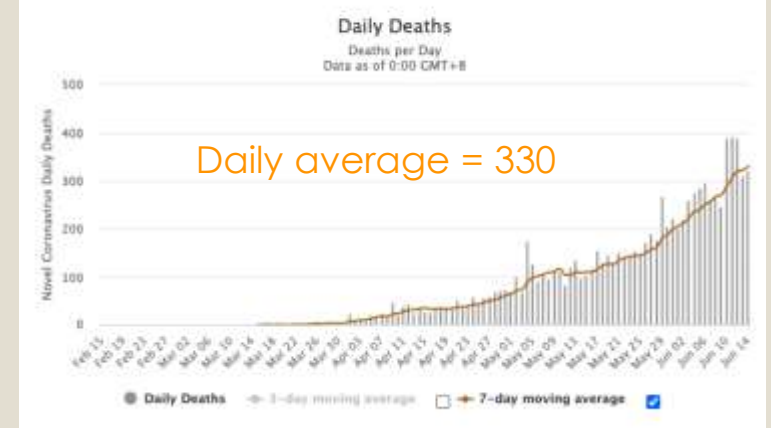

### Outcome of Cases (Recovery or Death) in India

### Total Coronavirus Deaths in India

### Daily New Deaths in India

# Was the nationwide lockdown successful?

## Positives

- Recovery rate from 9% to 50%
- Doubling rate from 5.4 to 16 days
- Testing capacity ~ 1 lakh per day
- Without any intervention, models showed ~ 50 lakh infections; saw 1.12 lakh confirmed cases
- CFR and death/Mn low

## Negatives

- Cases increased from 657 to 198,609 (300 fold)
- Deaths increased from 12 to 5,408 (450 fold)
- Daily case increase from 121 to 8,782 (72 fold)
- Testing still low ~4000/Mn people
- Internal migration from cities to small towns and villages

# State of the Union

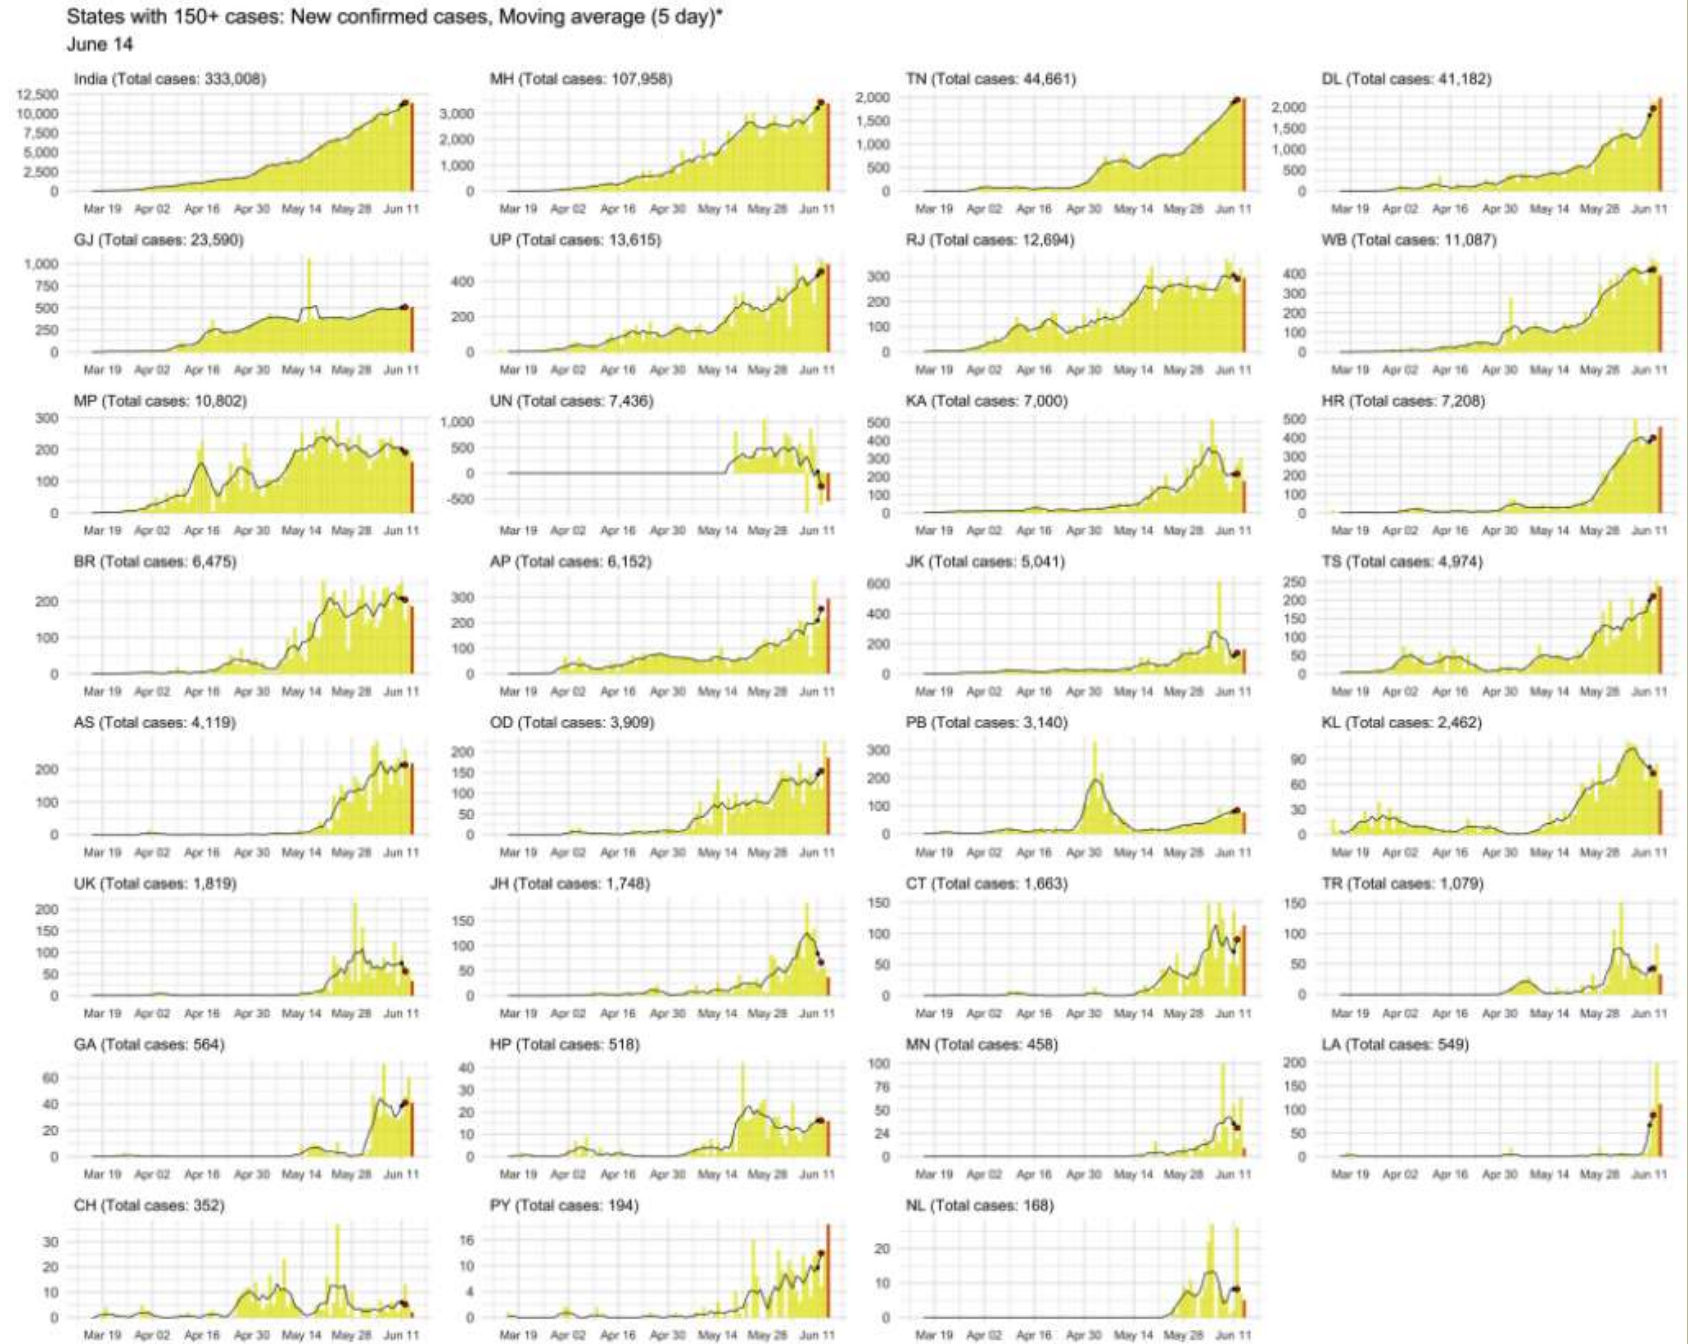

- 75% new cases are still coming from 3 states –

Maharashtra

Tamil Nadu

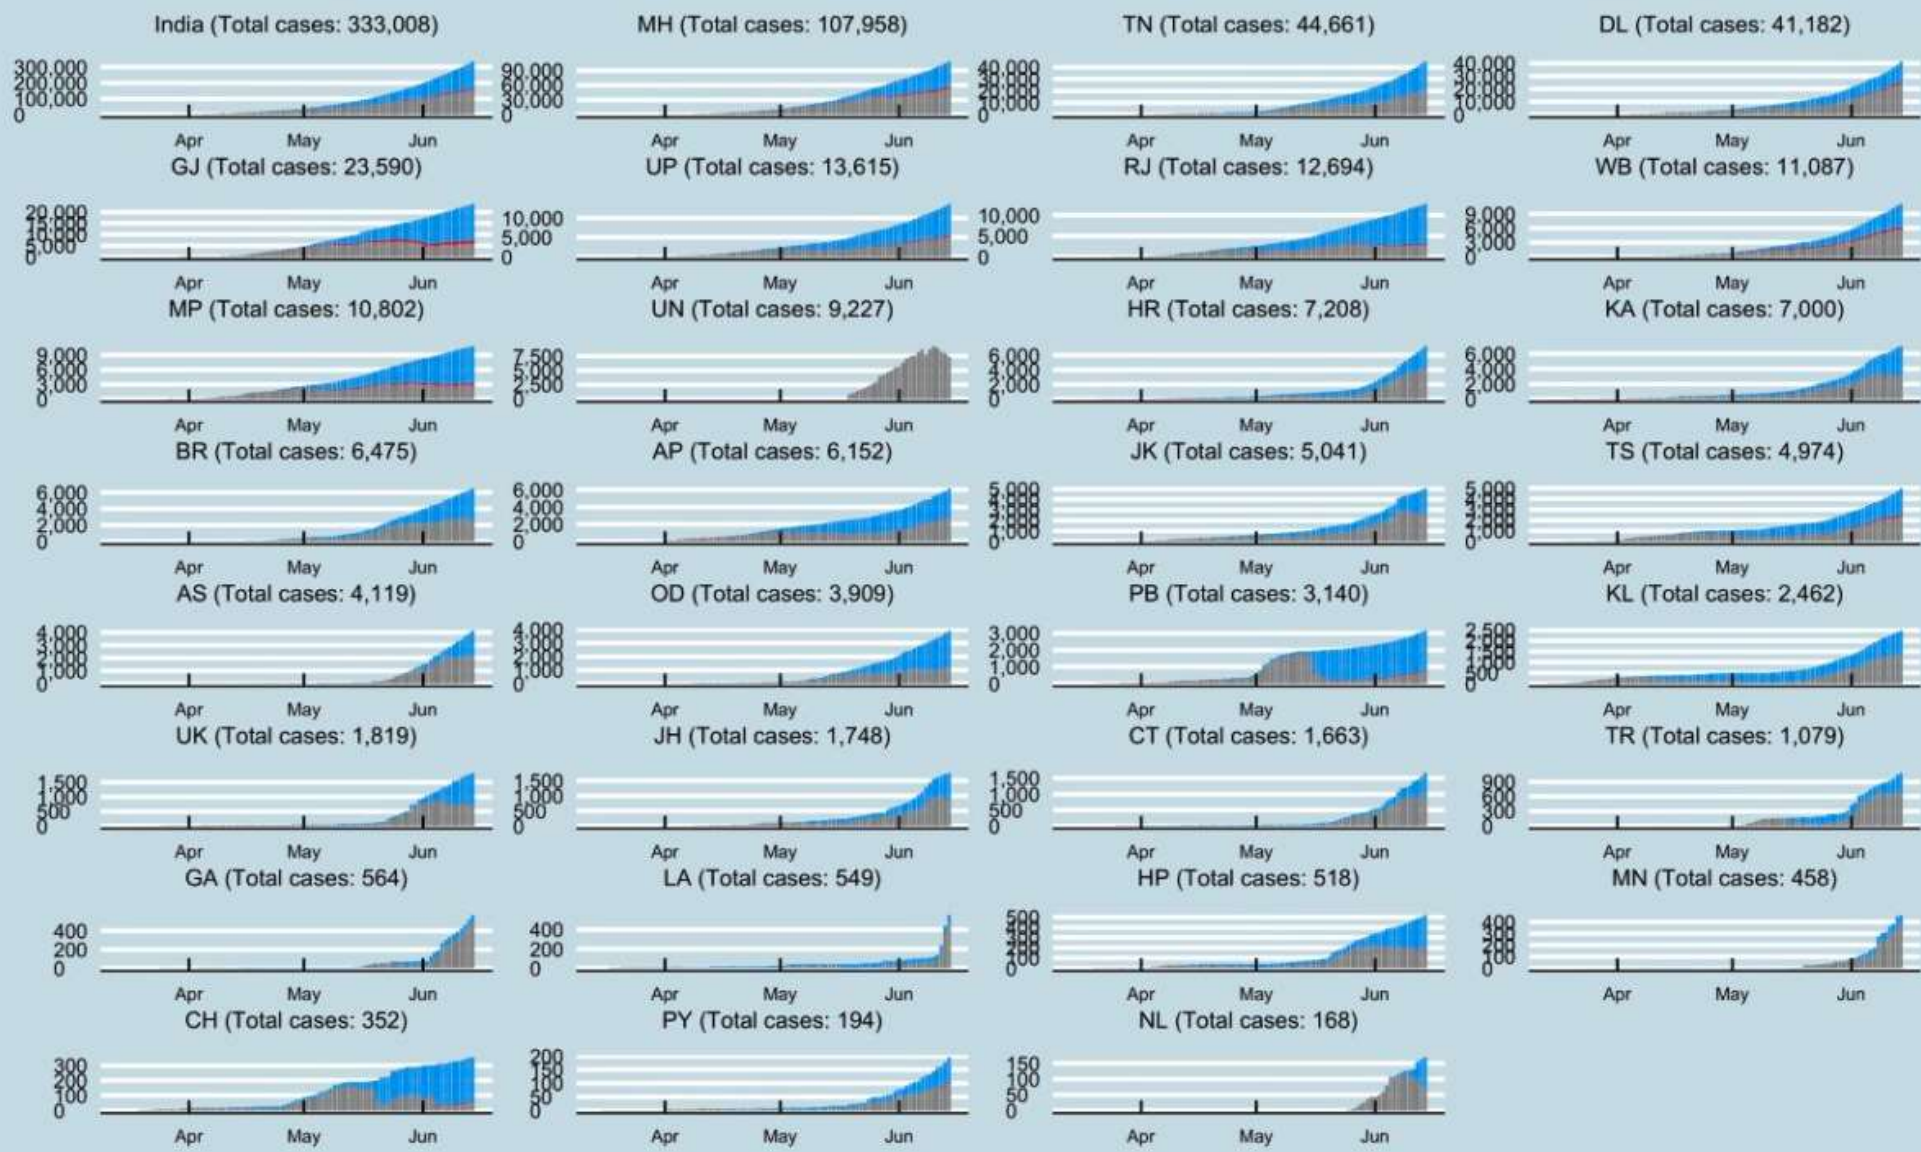

Delhi

- For consecutive days Delhi reports highest increases

Active, Deaths, Recovered cases in States with 150+ confirmed cases as of June 14

Recovered Death Active

# State of the Union

How are states recovering?

## Genome

Nucleotide identity to SARS-CoV-2

Length:  $\approx 30\text{kb}$ ;  $\beta$ -coronavirus with 10-14 ORFs (24-27 proteins)

Evolution rate:  $\sim 10^{-3} \text{ nt}^{-1} \text{ yr}^{-1}$  (measured for SARS-CoV-1)

Mutation rate:  $\sim 10^{-6} \text{ nt}^{-1} \text{ cycle}^{-1}$  (measured for MHV coronavirus)

## Replication Timescales

in tissue-culture

Virion entry into cell:  $\sim 10$  min (measured for SARS-CoV-1)

Eclipse period:  $\sim 10$  hrs (time to make intracellular virions)

Burst size:  $\sim 10^3$  virions (measured for MHV coronavirus)

# Virus replication and drugs

(A) Neutralizing Antibodies

(B) Hydroxychloroquine

(C) Remdesivir, Favipiravir

(D) Ritonavir, Lopinavir

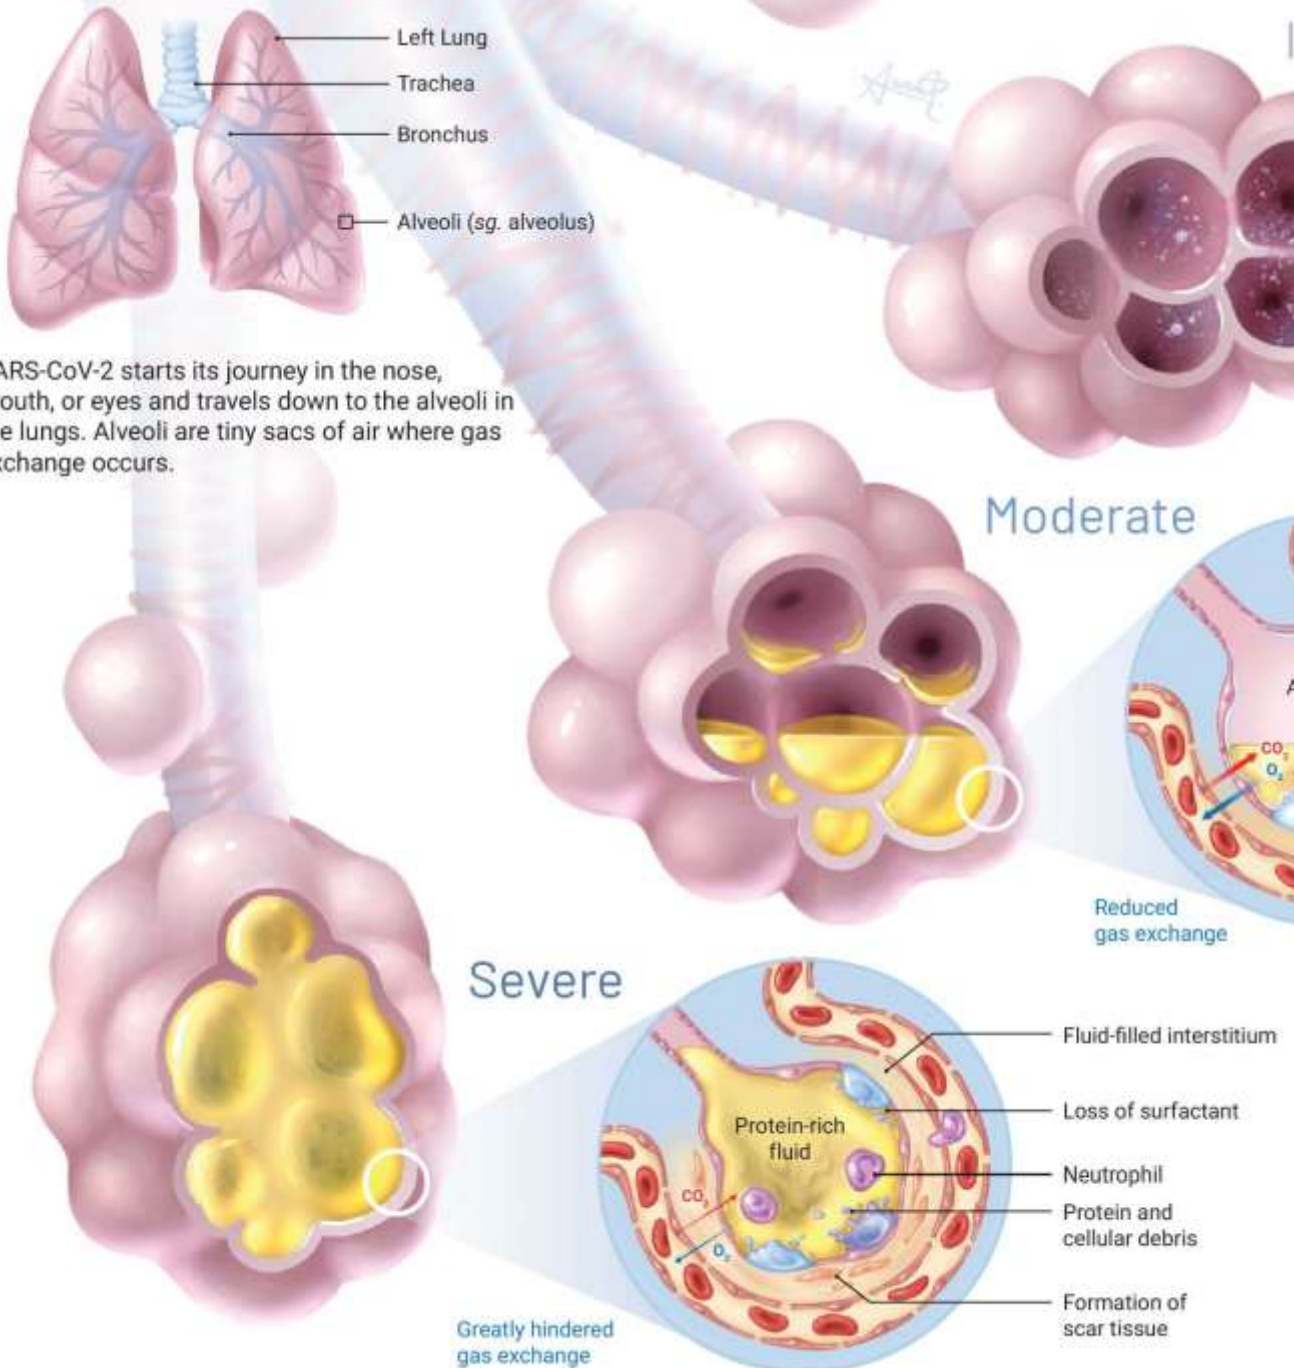

**Angiotensin-converting enzyme 2 (ACE2)** is an enzyme attached to the outer surface of human cells in the lungs, arteries, heart, kidney, and intestines. Both SARS-CoV and SARS-CoV-2 use these cells as receptors for infecting humans.

But SARS-CoV-2 went through mutations which has enabled it to **bind with ACE2 more efficiently**, making it more successful at human to human transmission.

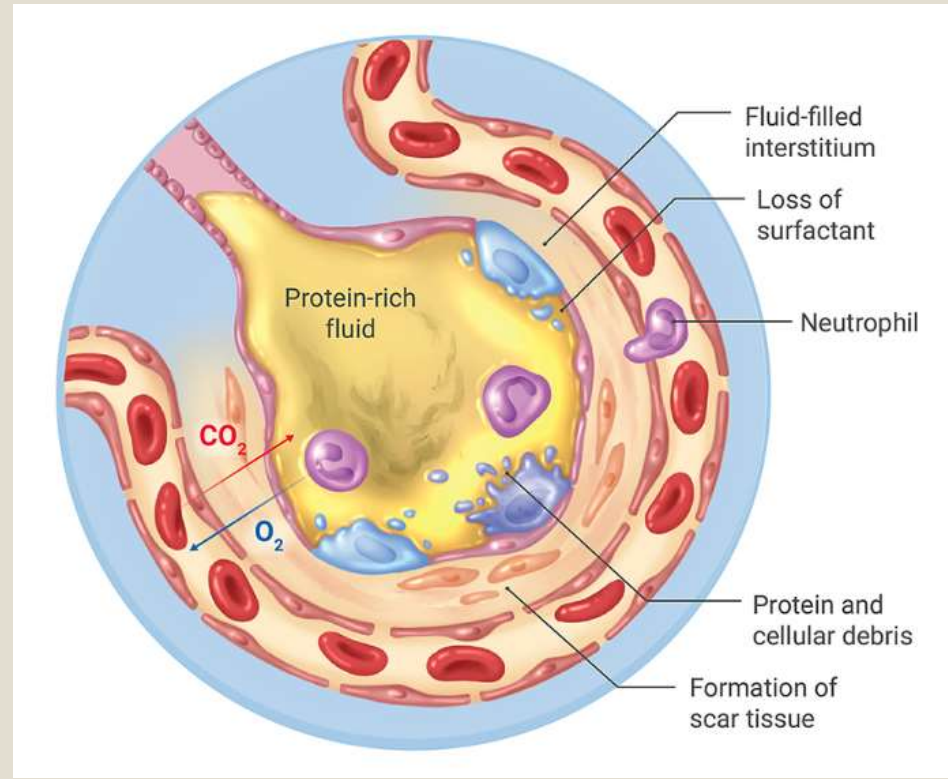

This invisible feature on the crown of SARS-CoV-2 is the reason why it has a death toll of **265,000 compared to 914 by its cousin, SARS-CoV**

SARS-CoV-2

# Pneumonia

# Testing for Covid-19

# Drug trials: Phase III - IV

Drug candidate	Description	Existing disease approval	Trial sponsor(s)	Location(s)	Expected results
Remdesivir	antiviral; adenosine nucleotide analog inhibiting RNA synthesis in coronaviruses	investigational <sup>[78]</sup>	Gilead, WHO, INSERM, NIAID	China, Japan initially; expanded internationally in Global Solidarity and Discovery Trials, and US NIAID ACTT Trial	April (Chinese, Japanese trials) to mid-2020
Hydroxychloroquine or chloroquine	antiparasitic and antirheumatic; generic made by many manufacturers	malaria, rheumatoid arthritis, lupus (International) <sup>[84][85]</sup>	CEPI, WHO, INSERM	Multiple sites in China; Global Solidarity and Discovery Trials, Europe, international	April 2020 (Chinese trials); mid-2020
Favipiravir	antiviral against influenza	influenza (China) <sup>[87]</sup>	Fujifilm	China	April 2020
Lopinavir/ritonavir without or with Rebif	antiviral, immune suppression	investigational combination; lopinavir/ritonavir approved <sup>[89]</sup>	CEPI, WHO, UK Government, Univ. of Oxford, INSERM	Global Solidarity and Discovery Trials, multiple countries	mid-2020
Sarilumab	human monoclonal antibody against interleukin-6 receptor	rheumatoid arthritis (USA, Europe) <sup>[90]</sup>	Regeneron-Sanofi	Multiple countries	Spring 2020
ASC-09 + ritonavir	antiviral	combination not approved; ritonavir approved for HIV <sup>[89]</sup>	Asclepis Pharma	Multiple sites in China	Spring 2020
Tocilizumab	human monoclonal antibody against interleukin-6 receptor	immunosuppression, rheumatoid arthritis (USA, Europe) <sup>[93]</sup>	Genentech-Hoffmann-La Roche	Multiple countries	mid-2020
Lenzilumab	humanized monoclonal antibody for relieving pneumonia	new drug candidate	Humanigen, Inc.	Multiple sites in the United States	September 2020
Dapagliflozin	sodium-glucose cotransporter 2 inhibitor	hypoglycemia agent <sup>[96]</sup>	Saint Luke's Mid America Heart Institute, AstraZeneca	Multiple countries	December 2020
CD24Fc	antiviral immunomodulator against inflammatory response	new drug candidate	Oncolimmune, Inc.	Multiple sites in the United States	2021

# Covid-19 Vaccines

Developer	Type	Phase
Moderna	mRNA	2 (W)
BioNTech + Pfizer	mRNA	1/2 (W)
Inovio	DNA	1
Oxford + AstraZen	Viral vec (ChAd)	2/3 (W)
CanSino Bio	Viral vec (Ad5)	2
Novavax	Protein	1/2
Clover + GSK	Protein	1
SinoVac	Whole virus	1/2
SinoPharm	Whole virus	1/2
Chinese Acad Sci	Whole virus	1
Beth Israel + J&J	Viral vec (Ad26)	PC (W)
Merck + IAVI	Viral vec (VSV)	PC (W)

The New York Times; 10 June 2020

# Herd immunity

## Herd immunity estimate

At least 60% of population

## New York City

19.9% have antibodies May 2

~16,000 deaths

## London

17.5% have antibodies May 21

~7,500 deaths

## Madrid

11.3% have antibodies May 13

~8,700 deaths

## Wuhan (returning workers)

10% have antibodies April 20

~4,000 deaths

## Boston

9.9% have antibodies May 15

~650 deaths

## Stockholm region

7.3% have antibodies May 20

~2,200 deaths

## Barcelona

7.1% have antibodies May 13

~6,500 deaths

## Should India go for herd immunity?

India population = 138 crores

If 60% infections for herd immunity,

Infected people = 83 crores

- If population mortality = 0.5%

~ 40 lakh deaths

- If population mortality = 0.08%

~ 6.6 lakh deaths

### Coronavirus & COVID-19

- Coronaviruses are part of a large family of viruses, many of which are known to cause respiratory infections, and sometimes more serious illnesses.
- The name "coronavirus" is derived from Latin roots, meaning "crown", and refers to the appearance of the virus as seen under the microscope.
- Recently discovered coronavirus causes coronavirus disease COVID-19 which appears to be more deadly than the seasonal flu virus.

**Go the distance to stop the spread of COVID-19**

When a person with COVID-19 sneezes / coughs, Sneeze droplets with virus land on nearby surfaces. Coronavirus can stay on surfaces for up to 3 days!

These sneeze droplets with virus can infect a person nearby.

Inside the body, the virus attacks and enters human cells.

Virus multiplies inside the cell, kills the human cell it entered and spreads to infect other cells.

**Protect yourself**

- Maintain a distance of at least 1 metre with others.
- Avoid mass gatherings and crowded places like movies, gym, religious places etc.
- Work from home and avoid non-essential travel.

### कोरोनावीरस और कोविड-19

**COVID-19 दूरी जरूरी है**

- कोरोना वायरस वायुवाही के एक बड़े परिवार का हिस्सा है, जिसमें से कई वायरस के पीछे एक बड़ी संख्या में संक्रमण और अस्थिरता और बीमारियों का कारण बनते हैं।
- कोरोनावीरस 'नए जीवन' को जन से दिया यह है जिसका अर्थ है मुकुट, यह नाम इस वायरस के मुख्य अकार को दर्शाता है।
- इस नए कोरोनावायरस के कारण कोरोनावायरस रोग कोविड-19 फैल रहा है जो बीमारी को वायरस की तुलना में अधिक खतराक प्रभावित होता है।

जब COVID-19 से प्रभावित व्यक्ति छींकता या खांसता है, पास की सतहों पर वायरस भरी छींक का घानी बूंदें गिर जाती हैं।

इन बूंदों में बीजक वायरस, पास में उपस्थित व्यक्ति को संक्रमित कर सकते हैं।

वायरस मानव कोशिका के अंदर सूक्ष्म रूप से प्रवेश करता है और वायरस हमले करता है और मानव कोशिकाओं में प्रवेश करता है।

दूरियों के साथ कम से कम 1 मीटर की दूरी बनाए रखें

सामूहिक समारोहों और भीड़ वाली जगहों जैसे फिल्म पर, जिम, धार्मिक स्थल, आदि में न जाएं

घर से काम करें और गैर जरूरी यात्रा से बचें

### KNOW YOUR VIRUS

Coronaviruses are tiny, with a set of genes, proteins & a fatty membrane. These viruses need a living host to multiply, but some can survive in air, water and on surfaces for many days.

Coronaviruses cause respiratory infections and other serious illnesses.

COVID-19 is caused by the new Coronavirus, resembles the seasonal flu but spreads faster and is deadlier.

**What makes the new Coronavirus spread faster?**

- This virus looks like a spiky ball.
- Spikes help this virus to stick tightly to cells in the nose and throat.
- Hence it spreads via cough/sneeze in people.
- Washing hands with soap for just 20 sec can break the fatty membrane of the virus and kill it.

**Protect Yourself**

- Cover your mouth and nose while sneezing/coughing.
- Avoid spitting in public.
- Stay at home unless going out is essential.
- Wash your hands frequently with soap.
- Avoid touching face, eyes or nose.
- Avoid coughing/sneezing into hands.
- Avoid touching face, eyes or nose.

**IndiaAlliance**  
DIT wellcome  
[www.indiaalliance.org](http://www.indiaalliance.org)

### COVID-19

**How did I get to Humans?**

I have been living happily in bats and other wild animals, but human activities (deforestation, and I come in contact with people).

I use my spikes to attach human cells and get busy making copies of myself. I am told this makes people very sick and they can even die.

**Who am I? Where do I come from? How do I look?**

I don't belong to any country, I'm not nationality.

I am the 7th coronavirus to infect humans, I cause COVID-19.

I live in bats but don't make them sick.

I have human friends, Scientists will tell you that I resemble the viral predecessors, I am my own boss!

**Stand neutral!**

Vertical professional: know the better, better to stand.

To fight me, you need to be healthy, not healthy, be kind to each other.

Wiping faces with soap and water for 20 seconds can kill me!

I can't get inside your body if you avoid touching your face often.

Scientists are working the and right to find a vaccine. My wish is yours!

# Key messages

1. Follow government and WHO guidelines
2. Behave as an infected person; protect those around you
3. Be aware of myths
  - a. “Strong” and “Weak” strains of virus circulating in the world
  - b. Chloroquine / Hydroxychloroquine as a preventive
  - c. Past malaria or BCG vaccination protects you from Covid-19
  - d. Summer temperatures will end the pandemic
4. Don't wait for a drug or vaccine; break the transmission
5. Lockdowns are difficult; help those less fortunate
